

ISHA ZULFIQAR KHAN

AI / ML Engineer

Phone: +92 327 5284604 | Email: ishazulfiqarkhan786@gmail.com | Location: Islamabad, Pakistan

PROFILE

Computer Science student with hands-on experience in Machine Learning, Deep Learning, and Full-Stack Development. Skilled in Python, TensorFlow, Scikit-learn, Pandas, NumPy, Flask, and React. Built end-to-end AI applications including recommendation systems, predictive models, and CNN-based image classification. Passionate about developing intelligent solutions and continuously expanding expertise in AI and Machine Learning.

SKILLS

Python, TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Flask, REST APIs, React, JavaScript, PHP, SQL, Git, Machine Learning, Deep Learning, Convolutional Neural Networks (CNN), Data Preprocessing, Time Management, Effective Communication, Critical Thinking

PROJECTS

CNN MNIST Digit Recognition

Python | TensorFlow | Keras | Flask | React

- Developed an end-to-end handwritten digit recognition application using Python, TensorFlow, Keras, Flask, and React.
- Built and trained a Convolutional Neural Network (CNN) on the MNIST dataset, applying image preprocessing techniques such as normalization and reshaping to improve model performance.
- Integrated the trained model with a Flask REST API and a React-based frontend, enabling users to draw digits and receive real-time predictions through an interactive web interface.

Movie Recommendation System

Python | Pandas | Scikit-learn | Flask | React

- Built a content-based movie recommendation system using Python, Pandas, Scikit-learn, Flask, and React.
- Processed and analyzed movie metadata, generated feature vectors, and implemented cosine similarity to recommend movies based on user input.
- Developed a Flask backend to serve recommendations through REST APIs and designed a responsive React frontend for searching and discovering similar movies.

Calorie Burn Prediction

Python | Scikit-learn | Flask | React

- Designed and implemented a machine learning application to estimate calories burned based on user health and activity data.
- Preprocessed the dataset, trained a regression model, and deployed it through a Flask REST API.
- Developed a responsive React frontend allowing users to input personal information and instantly receive calorie burn predictions.

EDUCATION

Bachelor of Science in Computer Science (Ongoing)

Szabist Islamabad — 2023 to Present

Intermediate in Computer Science (ICS)

Islamabad College for Girls — 2021 to 2023

LANGUAGES

English
